In response to the non-final Office Action dated March 11, 2002, please amend the above-identified application as follows:

In the Specification:

Please replace the Abstract as set forth below in clean form. Additionally, in accordance with 37 CFR 1.121(b)(1)(iii), the amended Abstract is set forth in a marked-up version in the pages attached to this Amendment.

ABSTRACT OF THE DISCLOSURE

A functional film comprising a compressed layer of functional fine particles obtained by compressing a layer containing the functional fine particles that is formed by application onto a support. The layer containing the functional fine particles is formed by applying a liquid in which the functional fine particles are dispersed onto the support and drying the liquid. The compressed layer of the functional fine particles is preferably obtained by compressing with a compression force of at least 44 N/mm². The functional fine particles are preferably selected from inorganic fine particles. The support is preferably a film made of resin. The functional films include, for example, a conductive film, a magnetic film, a ferromagnetic film, a dielectric film, a ferroelectric film, an electrochromic film, an
